ABSTRACT

Years 1998 till 2002 were the speculation era in the millennium that brought down the world economic cause existing and emanating the speculator, which incited the world's investor. In this world of the recession, Malaysian government had tried many things to increasing the economic to the save level.

And now the United States incited the world residents about the terrorist, which Islamic country had involved too. That's another reason why the Malaysia economic drops.

While correcting the reduce of Malaysia economic, Dato' Seri Dr. Mahathir Mohammad, Malaysian Prime Minister had gave his idea to the OIC (Organisation of Islamic Congress) on how to manage the recession clear the mess in Islamic Country from the terrorist. He had suggested investing to the tourism interest on the Islamic Country.

In other words, the Islands, villages, and cities could attract the tourist. This dissertation is concentrate on how the façade standardization and heritage building conservation had been done and can attracts peoples and tourist to visit them. The writer had been chose the Cameron Highland, Penang Island, and Singapore as his case study.

Many heritage building emanate in this country and should be realized by the Authority on he building conservation and façade standardization.

Conservation is not new in our country, but they need a concentration, understanding, conscientious, and passions. The term of conservation are includes; preservation, alteration, reconstruction and other thing that should be notified.

This is importance in achieving the levels of conservation. Needs to maintain the originality including the memory lane of the heritage building, and the cultural significant will make a big benefit.

There are several issues could be raised, such as; why the heritage building conservation is importance? And do the façade standardization could be an attracting to the tourist?

In he end of this dissertation, the writer will make conclude and suggestion on what could be done. Can the heritage building conservation achieve to its recommended levels and how the façade standardization can be related to the environment such o colour, materials and other things?

Contents

Chapter 1

- 1.0 Introduction
 - 1.1 Objective
 - 1.2 Scope of Works
 - 1.3 Hypothesis
 - 1.4 Methodology
 - 1.5 References
 - 1.6 The Limits
 - 1.7 Definition

Chapter 2

- 2.0 Development Historical In Tourism Country
 - 2.1 Introduction
 - 2.2 National Development Strategy Policy
 - 2.3 National Development Policy
 - 2.4 Malaysia 7th Planning
 - 2.5 Pulau Pinang
 - 2.5.1 Penang City Background
 - 2.5.2 Development Affect
 - 2.5.3 Bodies Involved in Developing Pulau Pinang
 - 2.5.4 Government Effort in Promoting Heritage Development
 - 2.6 Cameron Highland
 - 2.6.1 Cameron HighLand Background
 - 2.6.2 Development Affect
 - 2.6.3 Bodies That Involved in Developing Cameron Highland
 - 2.7 Brief History and Planning of Singapore
 - 2.7.1 Introduction
 - 2.7.2 Development Affect
 - 2.7.3 Bodies That Involved in Developing Singapore.
 - 2.8 Conclusion

Chapter 3

- 3.0 The Importance Of The Heritage Building Conservation Policy Due to the Tourism City
 - 3.1 Heritage Building Background
 - 3.2 The Importance of the Heritage Building Conservation
 - 3.3 The Importance Factors In Conservation
 - 3.4 Criteria That Determine Which Building to Conserve.
 - 3.5 Conclusion

Chapter 4

- 4.0 The Heritage Façade and Its' Elements
 - 4.1 Introduction
 - 4.2 Tudor and Jacobean
 - 4.3 Colonial (1607- 1780)
 - 4.4 Regency and Early 19th Century
 - 4.5 Baroque
 - 4.6 The Façade Elements the standardization
 - 4.7 Building Materials
 - 4.8 Building Color
 - 4.9 Conclusion

Chapter 5

- 5.0 Bodies That Involved in Conservation Heritage Building
 - 5.1 Introduction
 - 5.2 Guidelines in Heritage Building Conservation
 - 5.3 The Law Enforcement in Heritage Building Conservation

Chapter 6

- 6.0 Case Study
 - 6.1 Introduction
 - 6.2 Case Study Objective
 - 6.3 Case Study Methodology
